Axon Signal Sensor Holster Compatibility Catalog

axon.com

In quickly-evolving situations in the field, remembering to activate a camera may not be at the forefront of decision-making. Signal Sensor is a smart sensor designed to automatically activate configured Axon devices when a firearm is drawn from its holster, helping ensure that critical moments are recorded without requiring manual camera activation. Signal Sensor attaches to most standard firearm holsters and wirelessly connects to Axon's body-worn and Fleet in-car cameras, triggering recording when it detects a weapon being unholstered to enhance safety, transparency, and evidence collection. Signal Sensor must be used with compatible firearm holsters in order to function. This catalogue details the compatible holsters, organized by weapon manufacturer, holster brand, and weapon model.

Axon Signal Sidearm

Mount order information

Axon Signal Sidearm is not a universal product

- To place an order, please contact your Axon sales representative and provide them with your firearm model, holster information, and light model.
- If you are receiving Axon Signal Sidearm as part of a bundle benefit, it can only be used if you already have a compatible firearm/holster/light model combination.
- If your firearm/holster/light model combination is not found in the preceding charts, that means it is not currently supported. Please contact your Axon sales representative so we can work towards developing Axon Signal Sidearm compatibility in the future.
